ISRAEL JOURNAL OF MATHEMATICS

TABLE OF CONTENTS, VOLUME 256, 2023

Aharoni, R. and H. Guo *Rainbow cycles for families of matchings* 1

Alon, N. *Spanning trees with few non-leaves* 9

Alon, N. and R. Holzman *Near-sunflowers and focal families* 21

Bárány, I., G. Kalai and A. Pór *Universal sequences of lines in* $\mathbb{R}^d$ 35

Becker, O., A. Lubotzky and J. Mosheiff *Testability in group theory* 61

Beniamini, G. and N. Nisan *Bipartite perfect matching as a real polynomial* 91

Chudnovsky, M. and G. Kalai *Attempting perfect hypergraphs* 133

Even-Zohar, C. and J. Hass *Random colorings in manifolds* 153

Farber, M. and T. Nowik *The homology of random simplicial complexes in the multi-parameter upper model* 213

Friedgut, E. and Y. Iluz *Hyper-regular graphs and high dimensional expanders* 233

Friedman, J. and D. Puder *A note on the trace method for random regular graphs* 269

Goldreich, O. and A. Wigderson *Good permutation codes based on the shuffle-exchange network* 283

Guo, H. See R. Aharoni

Guterman, A., R. Meshulam and I. Spiridonov *Maximal generalized rank in graphical matrix spaces* 297

Hass, J. See C. Even-Zohar

Holzman, R. See N. Alon

Hrubeš. P. and A. Yehudayoff *Shadows of Newton polytopes* 311

Iluz, Y. See E. Friedgut

Kalai, G. See I. Bárány

Kalai, G. See M. Chudnovsky

Keller, C. and M. A. Perles *No Krasnosel'skiĭ number for general sets* 345

Kwan, M., A. Sah, M. Sawhney and M. Simkin *Substructures in Latin squares* 363

Lee, J. R. *Spectral dimension, Euclidean embeddings, and the metric growth exponent* 417

Lee, T. and A. Shraibman *Around the log-rank conjecture* 441

LEW, A., E. NEVO, Y. PELED AND O. E. RAZ *On the d-dimensional algebraic connectivity of graphs* 479
LI, Y., Y. QIAO, A. WIGDERSON, Y. WIGDERSON AND C. ZHANG *Connections between graphs and matrix spaces* 513
LUBOTZKY, A. See O. BECKER
MESHULAM, R., I. NEWMAN AND Y. RABINOVICH *Large simple d-cycles in simplicial complexes* 581
MESHULAM, R. See A. GUTERMAN
MOSHEIFF, J. See O. BECKER
NAOR, A., A. SAH, M. SAWHNEY AND Y. ZHAO *Cayley graphs that have a quantum ergodic eigenbasis* 599
NEVO, E. See A. LEW
NEWMAN, I. See R. MESHULAM
NISAN, N. See G. BENIAMINI
NOWIK, T. See M. FARBER
PELED, Y. See A. LEW
PERLES, M. A. See C. KELLER
PINCHASI, R. *On the odd area of the unit disc* 619
PÓR, A. See I. BÁRÁNY
PUDER, D. See J. FRIEDMAN
QIAO, Y. See Y. LI
RABINOVICH, Y. See R. MESHULAM
RAZ, O. E. See A. LEW
SAH, A. See A. NAOR
SAH, A. See M. KWAN
SAMORODNITSKY, A. *One more proof of the first linear programming bound for binary codes and two conjectures* 639
SAWHNEY, M. See A. NAOR
SAWHNEY, M. See M. KWAN
SHRAIBMAN, A. See T. LEE
SIMKIN, M. See M. KWAN
SPIRIDONOV, I. See A. GUTERMAN
WAGNER, U. AND P. WILD *Coboundary expansion, equivariant overlap, and crossing numbers of simplicial complexes* 675
WIGDERSON, A. See O. GOLDREICH
WIGDERSON, A. See Y. LI
WIGDERSON, Y. See Y. LI
WILD, P. See U. WAGNER

Yehudayoff, A. See P. Hrubeš
Zhang, C. See Y. Li
Zhao, Y. See A. Naor
