ISRAEL JOURNAL OF MATHEMATICS

TABLE OF CONTENTS, VOLUME 261, 2024

ANCONA, M. AND A. LERARIO *Symplectic instability of Bézout's theorem* 841

ASH, D. D. AND N. S. ORMES *Topological speedups for minimal Cantor systems* 91

BASOK, M., S. O. IVANOV AND R. MIKHAILOV *Homology of the pronilpotent completion and cotorsion groups* 281

BERING IV, E. A. AND D. STUDENMUND *Hall's universal group is a subgroup of the abstract commensurator of a free group* 493

DI BLASIO, G., F. FEO AND G. ZECCA *Regularity results for local solutions to some anisotropic elliptic equations* 1

BUSER, P., E. MAKOVER AND B. MUETZEL *Short homology bases for hyperelliptic hyperbolic surfaces* 977

CARRASCO, P. D. AND F. RODRIGUEZ-HERTZ *Contributions to the ergodic theory of hyperbolic flows: unique ergodicity for quasi-invariant measures and equilibrium states for the time-one map* 589

CASAZZA, P. G., S. J. DILWORTH, D. KUTZAROVA AND P. MOTAKIS *On uniqueness and plentitude of subsymmetric sequences* 613

CHENG, Y. *On the Rankin–Selberg L-factors for* $\mathrm{SO}_5 \times \mathrm{GL}_2$ 313

DAVIS, R., R. PRIES AND K. WICKELGREN *The Galois action on the lower central series of the fundamental group of the Fermat curve* 171

DILWORTH, S. J. See P. G. CASAZZA

FEO, F. See G. DI BLASIO

FLETCHER, A. N. AND J. PRATSCHER *On the mean radius of quasiconformal mappings* 419

FONAREV, A. AND D. KALEDIN *Bökstedt periodicity generator via K-theory* 695

GARONZI, M., Z. HALASI AND G. SOMLAI *On the diameter of Cayley graphs of classical groups with generating sets containing a transvection* 899

GONÇALVES, D. L. AND J. GUASCHI *Orbit configuration spaces and the homotopy groups of the pair* $(\prod_1^n M, F_n(M))$ *for* M *either* $\mathbb{S}^2$ *or* $\mathbb{R}P^2$ 37

GREENBERG, N. AND S. SHELAH *Many forcing axioms for all regular uncountable cardinals* 127

GUASCHI, J. See D. L. GONÇALVES

Halasi, Z. See M. Garonzi
Hirose, M. *Modular phenomena for regularized double zeta values* 501
Humphries, P. *The newform K-type and p-adic spherical harmonics* 357
Ivanov, S. O. See M. Basok
Joó, A. *On the packing/covering conjecture of infinite matroids* 765
Kaledin, D. See A. Fonarev
Kojman, M., A. Rinot and J. Steprāns *Ramsey theory over partitions I: Positive Ramsey relations from forcing axioms* 205
Kojman, M., A. Rinot and J. Steprāns *Ramsey theory over partitions II: Negative Ramsey relations and pump-up theorems* 223
Kutzarova, D. See P. G. Casazza
Lerario, A. See M. Ancona
Li, H. and K. Liu *Bernoullicity of lopsided principal algebraic actions* 739
Liu, K. See H. Li
Makover, E. See P. Buser
Mikhailov, R. See M. Basok
Mildenberger, M. L. a. H. *Distributivity and minimality in perfect tree forcings for singular cardinals* 549
Möller, P., L. Paris and O. Varghese *On parabolic subgroups of Artin groups* 809
Mono, A. *Locally harmonic Maaß forms of positive even weight* 671
Motakis, P. See P. G. Casazza
Muetzel, B. See P. Buser
Nenadov, R. *Probabilistic hypergraph containers* 879
de Oliveira, M. A., R. B. dos Santos and A. C. Vieira *Polynomial growth of the codimensions sequence of algebras with group graded involution* 445
Ormes, N. S. See D. D. Ash
Paredes, M. and R. Sasyk *Effective Hilbert's irreducibility theorem for global fields* 851
Paris, L. See P. Möller
Pratscher, J. See A. N. Fletcher
Pries, R. See R. Davis
Ramaré, O. *Notes on restriction theory in the primes* 717
Rinot, A. See M. Kojman
Rodriguez-Hertz, F. See P. D. Carrasco
dos Santos, R. B. See M. A. de Oliveira
Sasyk, R. See M. Paredes

Shaul, L. and J. Williamson *Lifting (co)stratifications between tensor triangulated categories* 249
Shelah, S. See N. Greenberg
Slomka, B. A. *A remark on discrete Brunn–Minkowski type inequalities via transportation of measure* 791
Somlai, G. See M. Garonzi
Stelzer, M. *The cube axiom and resolutions in homotopy theory* 395
Steprāns, J. See M. Kojman
Studenmund, D. See E. A. Bering IV
Tsui, M. C. *Simplifying matrix differential equations with general coefficients* 473
Varghese, O. See P. Möller
Vieira, A. C. See M. A. de Oliveira
Wang, M. *Waring–Goldbach problem in short intervals* 637
Wickelgren, K. See R. Davis
Williamson, J. See L. Shaul
Yokoyama, T. *Topological characterizations of recurrence, Poisson stability, and isometric property of flows on surfaces* 951
Zecca, G. See G. di Blasio
